

How to Install MetaMask and Add Ethereum

Welcome!

This short guide will help you install a MetaMask crypto wallet and add some Ethereum (ETH) to it.

We'll keep things simple, so even if you're completely new to crypto, you'll feel confident and safe.

What is MetaMask?

MetaMask is a free digital wallet that lets you store and manage your cryptocurrency. You can use it as a browser extension or a mobile app. It's one of the easiest and safest ways to get started with crypto.

Step 1: Go to the Official MetaMask Website

Visit the official MetaMask website at <https://metamask.io>. Always double-check that you're on the right website — there are fake ones out there!~

Step 2: Install MetaMask

- Click "Download" on the homepage.
- Choose your browser (Chrome, Firefox, Brave, or Edge) or mobile device (iOS or Android).
- Follow the instructions to add the MetaMask extension or app.~

Step 3: Create Your Wallet

- Open MetaMask and click "Create a new wallet."
- Set a strong password.
- You will be given a 12-word Secret Recovery Phrase. Write this down. This is VERY important because if you lose this recovery phrase, nobody will be able to get it back for you!
- Store your recovery phrase somewhere safe and offline (like on paper). Never share it with anyone.

Step 4: Add Ethereum (ETH) to Your Wallet

Once your wallet is ready, you can add some Ethereum (ETH) to it. There are two easy ways to do this:

- Option 1: Buy ETH directly in MetaMask using a card or bank transfer (available in some countries).
- Option 2: Transfer ETH from another crypto exchange like Coinbase, Binance, or Kraken.

To receive ETH, copy your MetaMask wallet address (it starts with “0x...”) and paste it into the “send” section of your exchange.

Step 5: Check Your Balance

After a few minutes, you’ll see your Ethereum appear in your MetaMask wallet. Congratulations — you now have your own crypto wallet!

Safety Tips

- Never share your Secret Recovery Phrase or private key.
- Always check website addresses carefully.
- Consider writing down your recovery phrase and storing it in a safe place.

Now you’re ready to explore the world of crypto safely. Have fun, stay smart and buy a Blixxi!
